We understand A. L. Kimble's people contemplate coming back from Frankfort, where Mrs. K. has been in the millinery business, and are going to start farming again.

Our school will soon close. Miss Miller has endeared herself to all by her kind and christian deportment and will be sadly missed from our midst, as she has always been present at our prayer circles and a faithful worker for the good of souls.

Last Friday was the last day of school, so the teacher and children concluded to have a picnic. The exercises were speaking and singing, accompanied by boat riding and fishing on Silver lake. Quite a large number of the older people attended and all had a good time.

The unsightly sawdust pile on the west side of town, which has completely blockaded Main Street, is being graded down in order to make a road through to the main road, which had been needed for some time, especially in the spring of the year. Wm. H. Fife got his mowing machine out and started to cut some June grass; got nicely to work and broke down his machinery, which brought the old time way of cutting grass into use- the scythe.

By the look of things we should think some man had rented one of the driving sheds back of the church, as we notice a stove pipe standing erect on the peak of the roof. Wonder who it is.

There has been some talk of starting a society here called the Christian Endeavor. We hope the young people will look into the matter, as it is a good field for them to work in.

We were very pleasantly surprised at our Sunday school by the very familiar faces and person of Miss Bertha Hill, who came home Saturday evening from Gill's Pier, Leelanaw county.

Wm. H. Fife has been putting up a building adjoining his barn to be used as follows: one part for a hog house, the other for storing his reaper, mower, grain drills, horse rake and harrows. It seems to be hard times, but the world moves and farmers and others are making improvements.
